## REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claims 1-25 are allowable over the Prior Art of record for at least the reason that the prior art fails to teach or suggest the system comprising: an enclosure; and a plane assembly mounted within the enclosure and configured to connect with multiple pluggable devices, the plane assembly comprising: a first plane portion having multiple connectors, the second plane portion being offset from the first plane portion to define a gap that is dimensioned to promote airflow via the gap through the enclosure; and wherein the first plane portion and the at least second plane portion are configured to both connect to each of the multiple pluggable devices.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Smith (US Patent 6,462,532) teaches the system 201, Fig. 3, comprising: an enclosure; and a plane assembly mounted within the enclosure and configured to connect with multiple pluggable devices 303, 312, the plane assembly comprising: a first plane portion 313 having multiple connectors 304, the second plane portion 314 being offset from the first plane portion. Smith does not teach said plane portions define a gap that is dimensioned to promote airflow via the gap through the enclosure, wherein the first plane portion and the at least second plane portion are configured to both connect to each of the multiple pluggable devices.

3. Cutts et al teach the system 10, Figs. 1-2, comprising: an enclosure 12; and a plane assembly mounted within the enclosure and configured to connect with multiple pluggable devices 30, 500, the plane assembly comprising: a first plane portion 200, 210 having multiple connectors 222-226, the second plane portion 20 being offset from the first plane portion to define a gap that is dimensioned to promote airflow via the gap through the enclosure. Cutts et al do not teach said system, wherein the first plane portion and the at least second plane portion are configured to both connect to each of the multiple pluggable devices (By Cutts et al multiple pluggable devices are different).
